

**"THE MODERN ANSWER TO YESTERDAY'S AWNING"**

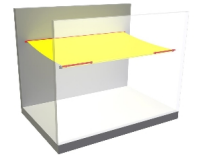

Translucent Waterproof Performance Fabric  
 Lightweight Aluminum Roller Tube  
 Stainless Steel or Painted Columns  
 Maximum Size (W x H):  
 236" x 226" (19.7' x 18.8')

2 tension columns

1 tension columns  
1 tension box

2 tension boxes  
...and more configurations

The Twister Sail awning harmonizes with building architecture. It adds a visual highlight to every facade with its minimalist design and free-floating sail membrane. The system enables an impressive 370 sq. ft. of coverage compared to traditional awnings and sun sails.

- Can be mounted to almost any facade with low-load attachment.
- Sail has extremely good self-cleaning properties.
- Dirt and leaves are not rolled up due to patented winding system.
- Can be rolled in or out effortlessly.
- Uniquely wind-resistant through free-floating suspension.
- Optimal rain protection via the waterproof membrane.
- No water build-up when mounted with an 8 degree slope or greater.
- Can run horizontally for under a Pergola or interior skylight use.

All-year-round use

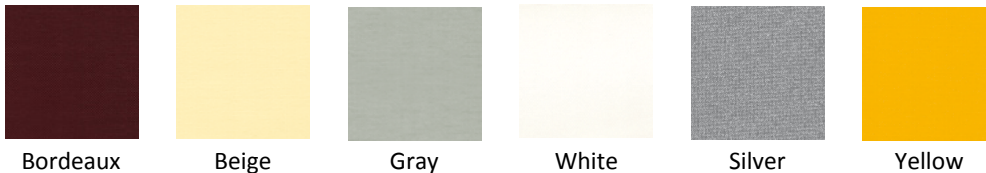

High UV Protection  
UPF 50+

Wind-dynamic due  
free-floating suspension

Rainproof, water runs off  
automatically from an  
inclination of 8+ degrees
